

I have been a XM Radio subscriber for the past 16 months and we seldom listen to any other stations. Satellite radio provides a wide spectrum of news and music that we enjoy very much. WE do not mind paying a monthly fee to receive these and resent the fact that the National Association of Broadcasters is attempting to limit what we can hear.

I respectfully urge you to reject the NAB's petition 04-160.

Sincerely,

Raymond E Austin
